

The Werner Weitner tool boards are more than just perforated metal sheets.

Most of the special tools and kits can be arranged in a systematic way on tool boards.

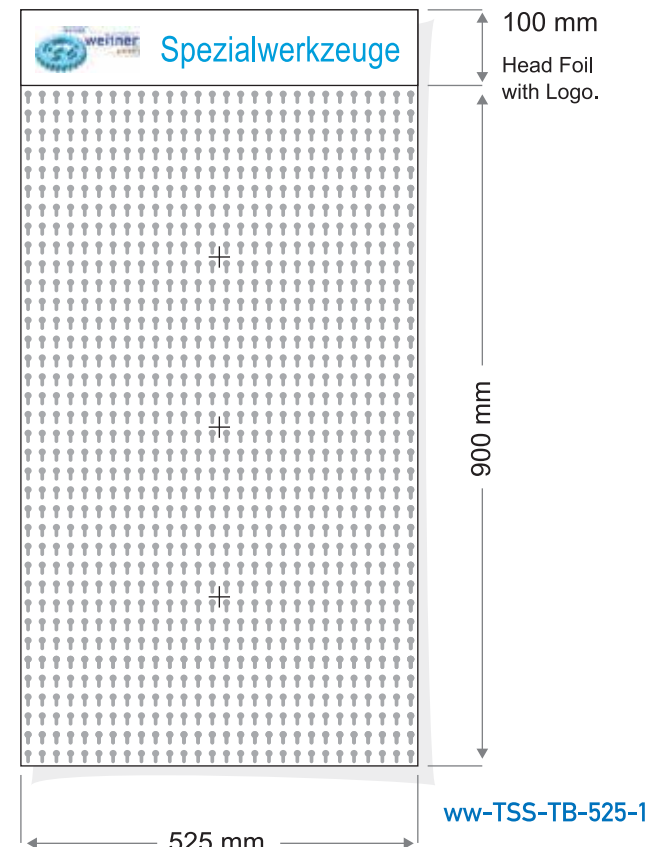

There are two boards available: a complete one (1050 x 1000 x 2 mm) and a half one (525 x 1000 x 2 mm). All systems based on these two boards and can be extended unlimited by mounting additional boards. With the holed pattern, attachable tool boards have a symmetric and integrated structure.

In addition to the keyholes, the boards also include round counter sunk holes for 4 mm screws. These are used for mounting the tool boards, either directly to a wall or to a furniture frame. There are 9 mounting points on the whole board.

The board surfaces have an epoxy resin coating at least 75 µ thick in various colours. If properly used, the tool boards have a 10-year warranty period.

Available in two sizes

Order Code	Description	Dimensions
ww-TSS-TB-1050-1	Complete Board	1050 mm x 1000 mm
ww-TSS-TB-525-1	Half Board	525 mm x 1000 mm
